Summary

Front-End Engineer with 7+ years of experience building high-traffic, scalable web applications using React, Next.js, and TypeScript across fintech, logistics, analytics, and global marketing platforms.

Experience

Senior Front-End Developer | Hogarth / Subvrsive | 2024 – 2025 - Taguig City, Philippines

Delivered frontend platforms for global Coca-Cola marketing campaigns reaching millions of users worldwide.

- Built mobile-first React + TypeScript interfaces supporting multilingual global audiences.
- Developed interactive animations and immersive UI experiences using modern frontend tooling including Three.js.
- Implemented internationalization across four languages for worldwide campaign rollout.
- Designed the project design system including typography, color tokens, and responsive breakpoints.
- Collaborated with cross-functional teams of engineers, designers, QA, and stakeholders to deliver campaign features under aggressive launch timelines.

Software Engineer Smudge — Remote (New Zealand) | 2022 – 2024

Built and modernized enterprise SaaS platforms for logistics and operational management.

- Led migration of a large production React platform to Next.js, implementing SSR/SSG architecture and modern routing.
- Conducted dependency modernization and large-scale codebase refactoring, improving maintainability and long-term scalability.
- Built modular component systems and optimized state management using Redux and Zustand.
- Established pull-request standards and engineering guidelines improving team code quality.
- Coordinated releases across Dev, UAT, and Production using Azure DevOps CI/CD pipelines.

Front-End Developer | Stratpoint Inc. | 2021 – 2022 - Remote

Developed fintech and enterprise platforms used by large Philippine digital services.

- Led frontend development for React fintech platforms including GCash mini-program features.
- Managed a team of 4 engineers, overseeing architecture decisions, code reviews, and delivery.
- Refactored legacy codebases into scalable modular React architecture.
- Delivered production releases across multiple environments with CI/CD workflows.

Front-End Developer Yardstick Analytics | 2019 – 2020 - Remote

- Modernized UI of analytics platforms using React and Redux.
- Integrated frontend systems with Power BI, MongoDB, Auth0, and SurveyGizmo.
- Maintained cloud assets across AWS S3 and Heroku environments.

Junior Frontend Developer GoDigital Corp | 2018 – 2019 - Quezon City, PH

- Developed production websites using **React and Vue**.
- Built reusable UI components and integrated APIs with backend services.

Technical Skills

Languages

JavaScript, TypeScript, HTML, CSS

Frameworks
